We know how important it is to complete a construction project on time and on budget. Together with 123Net, Michigan's largest local provider of high-speed fixed wireless and with over 55 PoP sites across the state, Rehmann's technology solutions group can provide quick installation and temporary fixed wireless solutions to your site with speeds up to 10Gbps to support your wireless needs on any job site. In addition to enhanced availability and quality using redundant IP network infrastructure, 123Net's fixed wireless delivers the utmost in performance, reliability and scalability.

Our fixed wireless solutions fit a variety of needs, including:

- Construction sites or job locations where remote or temporary office setup requires internet service
- Diverse or redundant internet service to your main coax of fiber-based internet service
- Creating wireless VPN connectivity between offices/locations
- Requirements to turn up internet connectivity quickly

## ABOUT REHMANN

Rehmann is a proud partner of the Builders Exchange of Michigan. Count on Rehmann to handle your technology needs with relentless service 24/7 from managed IT to managed networks, cybersecurity solutions and more. Our full-service in-house capabilities give you access to data analytics, business intelligence, and back-office technology solutions that scale with the needs of your company. Plus, hands-on engineers that keep your business on the leading edge of technology, so you have the confidence to pursue your purpose.

## ABOUT 123NET

123Net is Michigan's premier data center, network and voice services provider. Since 1995, they have successfully delivered the highest quality voice, data and colocation infrastructure services to progressive clients across Michigan, including large and small enterprises, carriers, ISPs, and a variety of technology organizations.

*\*Service is available within a 5 mile radius of PoP sites and pricing is budgetary. On-site surveys will be conducted after a signed contract has been received. For long-term installations, if there is no line of site to your location, there is a possibility that fixed wireless may not be a solution for you at this time. If this is to occur there are fiber solutions that may be available to you depending on location.*
